

## International Schools Assessment - Year 6 Analysis

We do not plan to continue administering the International Schools Assessments as part of our assessment review. However, we are very proud of our student results which benchmark our pupils against worldwide International Schools who sit the same test. A four year analysis demonstrates the significant achievements of our Year 6 students!

While the CAT4's indicate potential, our end of year Progress Tests (PT Series) indicate what has been attained during the school year in Reading (Content and Comprehension) and Mathematics (Content and Process). The PT tests are widely administered in the UK and provide a benchmark against UK National Averages. The data below, demonstrates that our students performed extremely well, significantly exceeding national averages. (the purple columns highlight the performance of Riverside students).
